"I have been a **professional pattern maker** for 10yrs+.
I work mainly in the **theatre world making costumes** for productions
such as "Jersey Boys", "Spiegelworld" and "Cirque Du Soleil",
but we also caterto fashion designers as a pattern maker as well.
I have not used a lot of drafting systems as I do most of my work
by hand for costuming, but I had the opportunity to learn
and use StyleCAD for my business.

It is an excellent program!

It is extremely easy to use and navigate.

It made my work as a pattern maker a lot easier and faster.

It also was nice to have such **pinpoint accuracy!**
I also love the grading section of the program.
All in all, I would **recommend** this program to anyone who
is looking to get a fashion pattern drafting and grading program.
I have been **blown away** with it's capabilities!
Also to note,
the **help tutorials and customer support has been outstanding**.
Just a great company overall!"
