

"Pattern & Grading System is basically one of **most effective and firm software** I have ever come across.

Marking is **totally unique**, pattern nesting and dragging options are simply easy to choose thus gives **best results** within allocated time.

Automarker is **reliable and dependable** for running markers automatically without being anxious. Markers could be set to run over night to get best results without overseeing.

Output Options are also **simple and easy** that anyone could learn to send files from one drive to another.

Overall Style CAD plays a vital role for our company as these software helps flow our work quickly and easily without any hickups which certainly pays towards our productivity."
